SUMMARY

A skilled and result oriented software engineer with passion for developing innovative applications. I have the knowledge of object oriented designs and patterns. I am an ardent solution provider who believes and adheres to writing code that not only works but is highly optimized, secured and scalable. Seeks a role that uses technical skills to bring lasting and efficient solutions to challenges, in a reputable organisation.

EXPERIENCE

3Line Card Management Limited, Software Engineer

September 2020 - PRESENT

- Restructured Freedom Admin Portal, agency banking platform for administrators; MVC architecture to RESTful API service.
- Responsible for reviewing existing systems, implementing new features, identifying and fixing bugs, and overall upgrade of provided solutions.
